KEYNOTE ADDRESS

**DR. TÚLIO DI GIACOMO
TOLEDO**

PERMANENT COURT OF
ARBITRATION

SESSION 1: *SWEET SUCCESS: IS THIS REALITY OR JUST FANTASY?*

When a hard-fought arbitration is won, the winning party often anticipates to quickly recover damages, costs, and even legal expenses. However, disputants and their legal advisors run a very real risk, and are sometimes left grappling with the reality that an arbitral award may only be worth the paper it is printed on.

Join our panel of legal specialists from around the world as they discuss the risks associated with the enforcement of commercial arbitration awards, the mechanisms employed during the asset tracing process, and the intricacies when recognising arbitral awards against sovereigns.

SESSION 2: *YOUR NEXT INVESTMENT IN CONSTRUCTION PROJECTS*

With the construction sector being the biggest contributor to the number of dispute cases in many countries, the popular view is that arbitration and litigation processes are inevitable in construction projects. While it is not wrong that construction projects are susceptible to conflicts due to their complex, relational and lengthy nature, it is a misconception to think that all conflicts will necessarily escalate into expensive and time-consuming disputes.

Join us in this seminar as we discuss how dispute avoidance panels can help construction professionals increase their prospects of completing the project in time, within budget and with no disputes.
