

Talk of the Town:

ARBITRATION, EMERGING TRENDS AND THE SCALE OF JUSTICE

As we embark on the third quarter of 2024, where rapid globalisation, complex legal strategies, and technological innovation continue to take centre stage, arbitration has demonstrated its adaptability by expanding its horizon and embracing the uncertainties and challenges ahead. Amidst these evolutions, the emerging trends such as the interplay between arbitration and insolvency, the growing appetite for litigation funding, heightened scrutiny of arbitrator ethics, and the adoption of artificial intelligence shed light on the potential of arbitration to uphold justice.

Join us in this conversation as we explore how arbitration adapts and navigates these global trends, meeting contemporary demands and striving for a balanced scale of justice.
